

COMMUNITY INFORMATION EXCHANGE

VISIONLINK Community Operating System™

CommunityOS®

The first and only AIRS compliant management system for human services that also provides complete administrative flexibility for all components of the platform.

The only multi-agency, multi-program, multi-event platform for coordinating core operational activities following a disaster, emergency, or public health crisis.

This platform is built for direct collaboration with the public and private sectors, health care and governmental agencies.

Proven Expertise

For more than three decades Visionlink has powered the leading coordinated care organizations. Expert, experienced staff, hundreds of community deployments, the most advanced and comprehensive solution in the market.

Comprehensive Platform

CommunityOS is the only comprehensive platform built to solve inter-agency coordination challenges at scale—it is designed to be a “whole community” solution. More than an API Builder, the entire CommunityOS platform is flexible, built from new tech in an advanced and modular format. Specifically, the data architecture is designed for data exchange and analytics from the ground up. CommunityOS opens up the tools for your entire community. **Information Exchange is what we do!**

- The only integrated **API Builder**
- We **move more than one billion fields of data every day** between systems
- First to support data exchange standards between 211s
- First to combine 211 & HMIS services
- First to create a nationwide, multi-agency, coordinated care platform for case management
- Supported by Nationwide, Expert practitioners & SMEs
